

Project Design Phase-II

Data Flow Diagram & User Stories

Date	29 June 2026
Roll Number	23A51A42B1
Project Name	Laptop Request Automation using ServiceNow
Maximum Marks	4 Marks

Data Flow Diagrams:

The Laptop Request Automation system is designed to streamline the process of requesting laptops within an organization using ServiceNow. Employees (requesters) submit laptop requests through the Service Catalog. The request is automatically routed to the Manager for approval. Once approved, a task is created for the IT team to fulfill the request. Throughout the process, email notifications are sent to the requester, approver, and IT team. The system stores all request details and status in the ServiceNow database, and integrates with external systems if required (e.g., inventory system, email system).

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requester)	Laptop Request Submission	USN-1	As an employee, I can submit a laptop request through the Service Catalog by selecting the laptop type and providing the required details.	Laptop request is successfully submitted and Request Item (RITM) is created.	High	Sprint-1
Employee (Requester)	Request Tracking	USN-2	As an employee, I can view the status of my laptop request at any time.	User can see request status such as Requested, Approved, In Progress, or Completed.	High	Sprint-1
Employee (Requester)	Notifications	USN-3	As an employee, I receive email notifications whenever my request status changes.	Email notification is sent after submission, approval, and completion.	High	Sprint-1
Manager	Approval Process	USN-4	As a manager, I can approve or reject laptop requests assigned to me.	Manager can approve or reject the request, and the decision updates automatically.	High	Sprint-1
Manager	Approval Comments	USN-5	As a manager, I can provide comments while approving or rejecting a request.	Comments are saved and visible in the request history.	Medium	Sprint-2
IT Support Engineer	Task Management	USN-6	As an IT support engineer, I receive a catalog task automatically after manager approval.	Catalog Task (SCTASK) is automatically created after approval.	High	Sprint-1
IT Support Engineer	Laptop Fulfillment	USN-7	As an IT support engineer, I can complete the laptop allocation task after issuing the laptop.	Task status changes to Closed Complete after fulfillment.	High	Sprint-1

IT Support Engineer	Task Updates	USN-8	As an IT support engineer, I can update work notes and task progress.	Work notes are saved and visible in the request history.	Medium	Sprint-2
System Administrator	Workflow Automation	USN-9	As a system administrator, I can configure and manage the laptop request workflow using Flow Designer.	Workflow executes automatically without errors.	High	Sprint-1
System Administrator	Email Notifications	USN-10	As a system administrator, I can configure automated email notifications for all stages of the workflow.	Emails are sent successfully to requester, approver, and IT team.	Medium	Sprint-2
System Administrator	Catalog Management	USN-11	As a system administrator, I can create and manage the Laptop Request catalog item and variables.	Catalog item and variables are available in the Service Catalog.	High	Sprint-1
Organization	Process Automation	USN-12	As an organization, I want the complete laptop request process to be automated to reduce manual effort and improve efficiency.	Entire workflow executes from request submission to fulfillment automatically.	High	Sprint-2
