

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	29 June 2026
Roll Number	23A51A42B1
Project Name	Laptop Request Automation using ServiceNow
Maximum Marks	4 Marks

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Laptop Request Submission	Select Laptop Request from Service Catalog.Fill Purpose, Laptop Type, Manager, Business Justification.Accept terms and submit the request.
FR-2	Manager Approval	Automatically send the request to the selected manager.Manager reviews request details.Manager approves or rejects the request.
FR-3	Catalog Task Creation	Automatically create a Catalog Task after approval.Assign task to the IT Support Team.Display task in IT work queue.
FR-4	Email Notifications	Send email after request submission.Notify manager about pending approval.Notify employee after approval or rejection.Notify IT team after task creation.Send completion notification.
FR-5	Request Status Tracking	Display current request status.Track stages such as Submitted, Approved, Task Created, Completed.Allow users to view request history.
FR-6	Request Fulfillment	IT team prepares the requested laptop.Update Catalog Task status.Issue laptop to employee.Close the request after successful delivery.
FR-7	Data Validation	Ensure mandatory fields are completed.Validate manager selection.Prevent incomplete submissions.
FR-8	Reporting & Monitoring	Maintain request records.Track approval status.View completed and pending requests.Monitor workflow execution.

Non-Functional Requirements

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide a simple, intuitive, and user-friendly Service Catalog interface that allows employees to submit laptop requests with minimal training.
NFR-2	Security	Only authorized users can submit requests. Approvals are restricted to assigned managers. Access is controlled using ServiceNow roles and permissions.
NFR-3	Reliability	The workflow should reliably execute approvals, task creation, and notifications without data loss or processing errors.
NFR-4	Performance	Laptop requests, approvals, and catalog task creation should execute quickly with minimal response time to improve user experience.
NFR-5	Availability	The ServiceNow application should be available whenever users need to submit requests, ensuring continuous access to the service portal.
NFR-6	Scalability	The solution should support increasing numbers of users and be easily extendable to automate other IT service requests such as desktops, monitors, software, and accessories.
NFR-7	Maintainability	The workflow should be easy to modify, allowing administrators to update catalog items, approval rules, notifications, and tasks without major redevelopment.
NFR-8	Auditability	Every request, approval, task, and email notification should be logged, providing complete traceability for audits and compliance purposes.
