

USER ACCEPTANCE TESTING (UAT)

User Acceptance Testing (UAT) Template

Date	30 June 2026
Roll Number	23A51A42B1
Project Name	Laptop Request Automation using ServiceNow
Maximum Marks	4 Marks

Project Overview

Project Name

Laptop Request Automation in ServiceNow

Project Description

The Laptop Request Automation project automates the complete laptop request lifecycle using the ServiceNow platform. Employees can submit laptop requests through the Service Catalog. The request is automatically sent for manager approval. Once approved, a Catalog Task is created for the IT Support team, email notifications are sent, and the request status is updated automatically using Flow Designer.

Project Version

Version 1.0

Testing Period

23-06-2026 to 30-06-2026

Testing Scope

Features to be Tested

- Laptop Request Service Catalog Item
- Request Form Validation
- Manager Approval Workflow
- Flow Designer Automation

- Catalog Task Creation
- Email Notifications
- Request Status Tracking
- Approval/Rejection Logic
- End-to-End Workflow Execution

User Stories to be Tested

- Employee submits Laptop Request
- Manager receives approval request
- Manager approves/rejects request
- Catalog Task created automatically
- IT Team fulfills request
- User receives email notifications
- Request status updates correctly

Testing Environment

Platform

ServiceNow Developer Instance (Zurich Release)

Test Cases

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Status
TC-001	Submit Laptop Request	Login → Open Service Catalog → Select Laptop Request → Fill Details → Submit	Request should be created successfully	Request created successfully	Pass
TC-002	Validate Mandatory Fields	Leave required fields blank and Submit	System should display validation message	Validation message displayed	Pass
TC-003	Manager Approval	Submit request with Manager selected	Approval request sent to manager	Approval sent successfully	Pass
TC-004	Manager Rejects Request	Manager rejects request	Request should be rejected	Request rejected	Pass
TC-005	Manager Approves Request	Manager approves request	Approval status becomes Approved	Approved successfully	Pass
TC-006	Catalog Task Creation	Approve Laptop Request	Catalog Task automatically created	Catalog Task created	Pass
TC-007	Email Notification	Complete approval process	Email notification sent to requester	Email sent successfully	Pass
TC-008	Request Status Update	Complete workflow	Request status updated automatically	Status updated correctly	Pass
TC-009	Flow Execution	Execute complete workflow	Flow should complete without errors	Flow executed successfully	Pass
TC-010	End-to-End Testing	Submit → Approve → Task → Email	Entire process completed successfully	Workflow completed	Pass

Bug Tracking

Bug ID	Bug Description	Steps to Reproduce	Severity	Status	Additional Feedback
BG-001	Approval automatically approved when requester is System Administrator	Submit request using System Administrator account	Medium	Closed	Used another user/approval configuration for testing
BG-002	Manager field not available in approval configuration initially	Configure Ask for Approval action	Low	Closed	Resolved using Variables → Manager data pill
BG-003	Email recipient field not found initially	Configure Send Email action	Low	Closed	Correct data pill selected
BG-004	Test Flow remained in Waiting state	Execute Test Flow before approval	Medium	Closed	Approved request manually and workflow resumed
BG-005	Approval record not visible initially	Search Approvals table	Low	Closed	Correct filter applied

User Acceptance Summary

Requirement	Status
Laptop Request Submission	Accepted
Manager Approval	Accepted
Catalog Task Creation	Accepted
Email Notification	Accepted
Workflow Automation	Accepted
Request Tracking	Accepted
Flow Designer Execution	Accepted

Overall UAT Result** User Acceptance Test Status: PASSED**

The Laptop Request Automation project successfully meets all functional requirements. The workflow executes correctly from request submission to approval, catalog task creation, email notification, and request completion. The solution is ready for deployment and demonstration.

Notes

- All positive scenarios were successfully tested.
- Mandatory field validations worked correctly.
- Manager approval workflow executed successfully.
- Catalog Tasks were automatically generated after approval.
- Email notifications were triggered successfully.
- Flow Designer executed without runtime errors.
- The project achieved the expected automation objectives and is ready for production/demo purposes.
