Brainstorm & Idea Prioritization : Laptop Automation Request using ServiceNow

The aim of this project is to automate the laptop request process within an organization using ServiceNow. Employees can submit laptop requests through the Service Catalog. The request is routed to the manager for approval, and once approved, a task is automatically created for the IT team to fulfill the request. Email notifications are sent at every step, and the user can track the request status in real-time.

Step-1: Define the Problem Statement

Brainstorm & Idea Prioritization

Use this template to explore ideas and solutions for automating the laptop request process using ServiceNow.

-  10 minutes to prepare
-  60 minutes to think
-  1 person (Individual Project)

Before you collaborate

- **1. Define the goal**

Automate the laptop request workflow to simplify submission, approvals, task creation and notifications.
- **2. Understand the current problem**

Identify pain points in the existing manual process and areas that need improvement.
- **3. Think about possible solutions**

List as many ideas as possible without judging. Focus on creativity and automation.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorming.

PROBLEM

How might we automate the laptop request process to make it faster, transparent and easy to track for all users?

**Key Rules of Brainstorming**

-  Stay in topic.
-  Encourage wild ideas.
-  Defer judgment.
-  Listen to others.
-  Go for volume.
-  Build on others' ideas.
-  Be visual.
-  One conversation at a time.

Tip:
Focus on ideas in the High Priority zone first. These ideas bring high value and are easier to implement.
