Customer Problem Statement Template :

The **Laptop Request Automation in ServiceNow** project focuses on simplifying and accelerating the process of requesting laptops within an organization. By leveraging **ServiceNow Service Catalog, Flow Designer, Approval Workflows, Catalog Tasks, and Email Notifications**, the solution eliminates manual request handling and automates the entire laptop request lifecycle. Employees can easily submit laptop requests through a self-service portal, while automated approvals, task creation, and notifications streamline the fulfillment process. This results in faster request processing, improved transparency, reduced manual effort, and enhanced communication between employees, managers, and the IT department.

Aspect	Description in context of our project
 I am	 We are ServiceNow developers and IT automation enthusiasts working on building an automated network request management solution.
 I'm trying to	 Build a streamlined way for users to submit network requests and automate the entire approval, fulfillment and notification process.
 But	 Currently, the process is manual and time-consuming, leading to delays, errors, and limited visibility.
 because	 Requests are routed through emails and spreadsheets with no automation, proper tracking or SLA compliance.
 which makes	 The solution valuable by providing faster request handling, improved accuracy, better transparency, and higher user satisfaction.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An Employee	Request a laptop quickly for official work	The approval takes too long	The process is manual and depends on emails	Frustrated and unproductive
PS-2	An IT support member	Manage laptop requests efficiently	Requests are difficult to track	There is no centralized automated workflow	Overloaded and confused
PS-3	A New Employee	Get a laptop before my joining date	I don't know the request status	There are no automatic updates	Anxious and uncertain
PS-4	A Manager	Approve employee laptop requests quickly	I miss approval requests	Notifications are delayed or scattered	Worried about delaying employee work
PS-5	An Employee	Know who is handling my request	There is no visibility	The request is managed manually	Confused and dissatisfied
PS-6	An IT Administrator	Assign laptop installation tasks	I manually create tasks every time	There is no automation	Time is wasted on repetitive work
PS-7	An Employee	Receive confirmation after submitting a request	I don't get instant notifications	The process lacks automated emails	Unsure whether my request was received
PS-8	An Organization	Deliver laptops to employees on time	Requests are delayed	Approval and fulfillment are not automated	Lower employee productivity
PS-9	An HR Executive	Ensure new employees receive laptops	I must repeatedly follow up with IT	There is no tracking dashboard	Frustrated with constant follow-ups
PS-10	An IT Manager	Monitor all laptop requests	I cannot easily view pending approvals and tasks	Information is spread across multiple records	Difficult to manage resources effectively
