

Ideation Phase

Empathize & Discover

Date	29 June 2026
Project Name	Laptop Request Process in ServiceNow
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Uses of an Empathy Map :

- Understands the user's needs and problems.
- Helps view the situation from the user's perspective.
- Identifies user pain points and expectations.
- Improves communication within the project.
- Supports designing better, user-centered solutions.
- Helps create products or services that satisfy customer needs.

EMPATHY MAP

SAYS

1. "I need a laptop for my office work as soon as possible."
2. "I don't know who is handling my laptop request."
3. "I already submitted my request, but I haven't received any update."
4. "Can I track my laptop request online?"
5. "Why is my laptop request approval taking so long?"

FEELS

1. Frustrated because the approval process is delayed.
2. Confused due to the lack of request status updates.
3. Worried that work will be delayed without a laptop.
4. Unsure whom to contact regarding the request.
5. Satisfied when the request is processed quickly and transparently.

THINKS

1. There should be an easier way to request a laptop.
2. The approval process should be transparent.
3. I shouldn't have to repeatedly contact the IT department.
4. My request should automatically reach the right manager.
5. I should receive notifications whenever my request status changes.

DOES

1. Opens the Service Catalog and submits a laptop request.
2. Selects the required laptop type and provides business justification.
3. Waits for manager approval.
4. Checks the request status regularly in ServiceNow.
5. Receives approval notifications and waits for the IT team to issue the laptop.

PAINS

- Manual laptop request submission through emails or offline communication.
- Delayed manager approvals causing late laptop allocation.
- No real-time tracking of laptop request status.
- Manual assignment of laptop issuance tasks to the IT department.
- Poor communication between employees, managers, and the IT support team.
- Duplicate, incomplete, or lost laptop requests due to manual handling.
- Human errors during request processing and approval.
- Lack of transparency in the request lifecycle.
- Employees are unsure whom to contact for request updates.
- Increased paperwork and administrative effort.

GAINS

- Simple online laptop request submission through the Service Catalog.
- Faster manager approval using automated workflows.
- Real-time tracking of laptop request status.
- Automatic creation of Catalog Tasks for the IT department.
- Email notifications at every stage of the request process.
- Improved communication between employees, managers, and the IT team.
- Reduced paperwork and manual intervention.
- Increased efficiency through Flow Designer automation.
- Transparent and centralized request management.
- Reduced processing time and faster laptop delivery.
- Better user experience with a standardized request process.
- Easy monitoring and auditing of all laptop requests.
